

# Element

ASTN

All that work put me in my element  
All that talk put me in my element  
All them curves put me in my element  
That's why you're part of my regiment  
You affecting my development  
Girl you testing my intelligence  
When you aggressive but you delicate  
It puts me in my element

La da di da  
La da di da di da di da  
La da di da di da di da

Every time I'm in a sunken place  
And I tend to lose my patience  
Your energy brings me back around  
Often I forget about the basics  
Flipping through the pages  
But your perspective's simply profound  
Get me revved up like a jumper cable  
When I lose balance  
Yeah you keep me stable  
In my element  
You're my periodic table  
When I need you  
I know you're willing and you're able

All that work put me in my element  
All that talk put me in my element  
All them curves put me in my element  
That's why you're part of my regiment  
You affecting my development  
Girl you testing my intelligence  
When you aggressive but you delicate  
It puts me in my element

(You put me in my)  
La da di da  
(Oh you put me in my heart)  
La da di da di da di da  
La da di da di da di da

La da di da  
La da di da di da di da  
La da di da di da di da

Something bout your body  
When it's on mine  
(On mine)  
You gon' keep me waiting  
But you on time  
(On time)  
When you walk in  
Then it's on sight  
(On sight)  
We gon' get going  
And go all night

(All night)  
24 karat you a gold mine  
You what I've been looking for the whole time  
Love the way you write it you the bold type  
You ain't gotta pack it up  
You staying overnight

All that work put me in my element  
All that talk put me in my element  
All them curves put me in my element  
That's why you're part of my regiment  
(That's why you're part)  
You affecting my development  
(You are)  
Girl you testing my intelligence  
(You are)  
When you aggressive but you delicate  
It puts me in my element

La da di da  
La da di da di da di da  
La da di da di da di da

(Puts me in my element)

La da di da  
La da di da di da di da  
La da di da di da di da
