

Power Move

Astrid S

Her name is in their mouths
When she's not around
Her presence speaks volumes
Without making a sound

It's almost like she knows
Something we all don't
She wears the secrets of the universe
In a locket on her throat

Ooh
What a sight what sight
When she comes through
When you're watching her

You're watching power move
You're watching power move

Like a force of nature
Like lightning in a bottle
You could never change her
Her hand is on the throttle

You're watching power

She never bites her tongue
Can laugh until she's numb
Throws 'em back like water
The night is always young

She knows
Something we all don't
I saw the secrets of the universe
In a pocket on her coat

What a sight, what sight, what a sight
When she comes through
When you're watching her

You're watching power move
You're watching power move

Like a force of nature
Like lightning in a bottle
You could never change her
Her hand is on the throttle
You're watching power
