

I'm Nothin' Without You

Astrud Gilberto

I know as far as you know
It's the way it's meant to be
This love we didn't choose
This love is stronger far than we
I know as far as you know
Even though we are apart
The ocean that divides us
Doesn't change what's in our hearts
That's why I need to tell you
Don't be lonely don't be blue
'Cause every step I take will only take me back to you

The sea looks much more beautiful when it reflects the moon
The song is not a song until the voice is said in tune
The way the sun is brighter when the sky is summer clear
My smile is always brighter when I know that you are near
Some things just can't be changed
The rain is wet, the sky is blue
You're not complete without me
And I'm nothing without you

Some things just can't be changed
You're not complete without me
And I'm nothing without you!
