

Nicole's Interlude

astrus*

I wish that you would give me your last name
And hold me close and take away the pain
I'll give you everything I got
Boy I love you
Please come home

Still got your shampoo right beside of my shower
Volume on 45 cause you hate when its louder
Still got your hair ties on the side of my bed
Just in case you can't sleep and you want to give head
I ain't forget you I just had to remember
About all the love we had when we slept over together
Cause baby I know you did things but that's in the past
And I promise you baby if we work it'll last
Still got your toothbrush on my sink
Just in case you want to link
I'll give you everything I got girl I love you
If you please come back home to me

I wish that you would give me your last name
And hold me close and take away the pain
I'll give you everything I got
Boy I love you
Please come home
Please come home
Please come home
