

Let It Burn

The Ataris

Knowledge is key.
You can never know too much.

Well I won't let them
Keep me from learning all I can.
Public schools just stand up.
The system feeds our minds.

Did the system tell you about democracy?
The same system that supported slavery?

When we try to make a change
To lock us up and throw away the key.

I won't let you
Play me for a fool

But I cant pray in school.
Make a decision for yourself
Don't bother with any trends
Open up a book
And share the knowledge with your friends.

Did the system tell you about democracy?
The same system that created slavery?

When we try to make a change
To lock us up and throw away the key.
