

Stay with Me

ATB

If you've got a secret
You know you can always count on me
to keep it
When the ground is shifting
underneath your feet
And we can take it slow
if that's the way you wanna go oh oh
And I will see it through
I wanna know every part of you
And I want you to know me too

Whatever you say babe
stay with me, stay with me
What happens with me babe
stay with me, stay with me
And when you don't have enough
baby you can use my love
as long as you stay with me
stay with me

I can't believe it
I never had a dream that felt so real
And I need it
I thought that I'd forgotten how to feel
And we can keep it close
if that's the way you wanna go oh oh
No one needs to know
You know I'll keep it so sweet and low

And I want you to know me
And I want you to know me too

Whatever you say babe
stay with me, stay with me
What happens with me babe
stay with me, stay with me
And when you don't have enough
baby you can use my love
as long as you stay with me
stay with me
