Break Me First

Atlus

The second I saw you, darling, I knew I'd do
Anything for you to stay
You don't know long it took to find you, but I do
There's nothing I would ever change

We always meet in the middle
Instead of mixing the signals

I can't shake the feeling of a rain cloud
Always waiting for the day it's gonna rain down
Watch the water putting our flame out
Till I'm left here blowing smoke
Tell me if we're going on our way down
Don't tell me while you're on your way out
I know if we ever start to fade out
The truth is gonna hurt
But if you love me, baby, let it break me first

Who's to blame that I can't help me, that I'm unhealthy?
I sure as hell know it ain't you
I wanna believe in what you tell me, wanna be healthy
But my past keeps cutting through

I can't shake the feeling of a rain cloud
Always waiting for the day it's gonna rain down
Watch the water putting our flame out
Till I'm left here blowing smoke
Tell me if we're going on our way down
Don't tell me while you're on your way out
I know if we ever start to fade out
The truth is gonna hurt
But if you love me, baby, let it break me first

We always meet in the middle
Instead of mixing the signals

I can't shake the feeling of a rain cloud
Always waiting for the day it's gonna rain down
Watch the water putting our flame out
Till I'm left here blowing smoke (Left here blowing smoke)
Tell me if we're going on our way down
Don't tell me while you're on your way out (While you're on your way
out)
I know if we ever start to fade out
The truth is gonna hurt (The truth is gonna hurt)
But if you love me, baby, let it break me first

But if you love me, baby, let it break me first
But if you love me, baby, let it break me first
