

Mile High Love

Atom Smash

Save me, till the drop to the edge to the edge as we know it. Drag me, down the halls to the beach the hell I feel. Every time that I feel you coming. Set a flame right under me. I hear the crowd like the engine's rolling. Now I start to believe.

In a mile high love. Like no other. All around the world. She can take me further, my love. When you take me higher. Closer to the sun it don't get much hotter. Flying high when you touch down.

Ride me, don't you stop till you reach your destination. Nail me, to the cross till we all face gravity. Every time that I feel you coming. Set a flame right under me. I hear the crowd like the engine's rolling. Now I start to believe.

In a mile high love. Like no other. All around the world. She can take me further, my love. When you take me higher. Closer to the sun it don't get much hotter. Flying high when we touch down.

If this plane goes down. I die it'll be found. If our time runs out, I'll understand.

Now put your mask on, close your eyes. Now put your hair back, do you really hail the light. Now put your vest on, see your prayers and time. Now put your face back, kiss the world goodbye.

Mile high love. Like no other. All around the world. She can take me further, our love. We can take me higher. Closer to the sun it don't get much hotter.

Mile high love. Like no other. All around the world. She can take me further. Flying high, we'll be flying high, we'll be flying high when we touch down.

Ya! Mile high love. Mile high love. Mile high love.
