

# They Took Control of You

Atomic Rooster

Bright lights they shine down on you,  
Have they really come to take you away?  
White coats, they lurch over you,  
You're scared but not afraid, not afraid.  
You will be taken over,  
Take control of you.  
Making a mess out of you,  
Black sensors broken as they take it away.  
Dark days in cold rooms,  
Many foreign objects getting out of my way, out of the way.  
They are taking you over,  
You will be taken over,  
Take control of you, control of you.  
Take control of you, control of you.  
Take control of you, control of you.  
Take control of you, control of you.  
Take control of you!  
Don't fight, they take control of you.  
Too late, you're never going to get away.  
No one will ever know a thing.  
They won't know, they come to take you today, take today.  
You have been taken over,  
They have taken you over,  
They have taken you over,  
Take control of you, control of you.  
Take control of you, control of you.  
Take control of you, control of you.  
Take control of you, control of you.  
Take control, take control, take control - of you!
