

## All My Life

**Attack Attack!**

You blinded my eyes now for way too long  
Well I thought we were friends, but you proved me wrong  
You got in my head with the things that you said  
And you left me a mess now to top it off

There's one of us here without virtue  
Look in the mirror, don't want to  
You're keeping me down for your debut  
But your reign is through

All my life I was seeing smoke  
All my life I was breathing smoke  
(All I see is smoke)  
All my life I was breathing smoke

You work your way into my lungs  
Like a virus in the air  
A simple plague can't cut me off  
I'll never fall in line just to suffocate

Suffocate!

There's one of us here without virtue  
Look in the mirror, don't want to  
You're keeping me down for your debut  
But your reign is through

All my life I was seeing smoke  
All my life I was breathing smoke  
(All I see is smoke)  
All my life I was breathing smoke

All my life  
All my life, seeing  
All my life I was breathing smoke  
(All I see is smoke)  
All my life I was breathing  
Smoke
