

Say it to me

Attack Attack!

Stuck in the seams with material dreams
You've got it all but you still want more
Devoted queen to the weekend scene
She's got it all, she's got it all
She takes her time to put on a smile
So unrehearsed but the lines save her every time
There's no escape from the skin you're in
You're telling lies and its your disguise but you don't fool me
Tell me what you think about
You know it's only yourself
Say it to me, say it to me
Tell me what you think about
You know it's only yourself
Say it to me, say it to me
Bored now it seems with the latest disease
You've got it all but you still want more
The life you lead is a fantasy
She's got it all, she's got it all
You need this to go just the way you want it to
You still need this to go just the way you want it to
Tell me what you think about
You know it's only yourself
Say it to me, say it to me
Tell me what you think about
You know it's only yourself
Say it to me, say it to me
There's nothing worse than faking it
There's nothing worse than faking it
There's nothing worse than faking it
There's nothing worse
Tell me what you think about
You know it's only yourself
Say it to me, say it to me
Tell me what you think about
You know it's only yourself
Say it to me, say it to me
