Blue

Audien

Someone said you're on your way
I just hope you get there safe
I've been thinking about those days
I wonder what if I had stayed

Would you be falling down
Would you be stumbling down again
You know I hated that town
Wonder if you blame me now

Why'd you have to leave so soon
Still had someone left to lose
I would have been there for you
Now I all I ever see is blue

I wonder why you never moved
Cause trouble always followed you
Every time I drive back through
I think about our wasted youth

When we were falling down
When we were stumbling down together
You know I hated that town
Wonder if you blame me now

Why'd you have to leave so soon
Still had someone left to lose
I would have been there for you
Now all I ever see is blue

Why'd you have to leave so soon
Still had someone left to lose
I would have been there for you
Now all I ever see is blue

And if I ever drive back through
I'll think about our wasted youth
