

Interlude

Audrey Mika

You're having a very hard time
I want you to live in your prime time
It's the way that the world goes
In your prime
You told me you don't like your work
I say that it's the way the world goes
The way that the world goes

Don't break it down, don't analyze yourself (don't do that)
Think out the box, ya gotta see through yourself
You gotta know you're not the only one
You keep it up and tell me when you won

God told me I was never right for you
I didn't listen to him, no, no
I'm thankful for every single inch of you
For every single inch of you, babe
Collected, divided, subtracted down
You're only as strong as what you write down
You're just a big baby, you're in it now
Cuz it's always about who won
Yuh!
