

frozen halos

Au/Ra

I wish it would snow here
'Cause I've been waiting all year
If you were around
Like frost on the ground
I'd freeze the moment right here

There's no way of knowing
If the sky will open
And send me the gift
That's top of my list
But that's what I've been hoping for

They should be falling like falling angels
All around us, frozen halos
We'll be dancing in the silent night
And there'd be no more lonely Decembers
Like snowflakes, we'd just remember
Gently falling in the silent night

All the world is drowned out
Only muffled hearts pound
'Cause under snow coats
With warm hearts aglow
We're wrapped up on the ninth cloud

But If we had to goodbye
We could let the sun rise
'Cause time couldn't melt
The magic we felt
Swaying in the cool moonlight

They should be falling like falling angels
All around us, frozen halos
We'll be dancing in the silent night
And there'd be no more lonely Decembers
Like snowflakes we'd just remember
Gently falling in the silent night

And there'd be no more lonely Decembers
Like snowflakes we'd just remember
Gently falling in this silent night
