

Seeing green like it's in our eyes
When it's all gone we can't eat money
When we fall back into real life
The only thing we got is our bodies

But I got you
You're the only thing that's steady
When the world just gets too heavy
I got you
Buying temporary highs
Never think about the price
But I got you
You're the only thing that's steady
When the world just gets too heavy
I got you

Building castles, but they're made of sand
When the tide comes in, we're left with nothing
No more flowers growing in my hands
Feeling lost inside of my own body

But I got you
You're the only thing that's steady
When the world just gets too heavy
I got you
Buying temporary highs
Never think about the price
But I got you
You're the only thing that's steady
When the world just gets too heavy
I got you (You)
But I got you

We're out here chasing gold
Buying things that we can hope, but I can hold you
