

Young Giants

Au/Ra

Where's the party at?
The saints and the vandals
Pyro with a candle
They're all coming out tonight
Bring their body bags
'Cause that's where they want you
Down deep with the worm food
Yeah, they'll bury you alive

They take their bites
Just like piranhas
Sharpen their smiles
Kill me with kindness
We turn our backs, they're talking trash right there behind us
They'll do anything at all to fill the silence

Go 'head, hide behind your screens
Young giants
We're just fresh meat on your feed
Young giants
Step to us, you're gonna see
Young giants
We're ten feet taller than you'd have us believe

In their dark bedrooms
They swim in the blue glow
Ki-kill with a keystroke
With words they would never say
See us on the street
Their lips would be sealed shut
What's that? I don't hear much
With no username, you see we're the same
Now that we're face to face

Stepping on us to make you tall
Do you know that's what makes you small?
So

Go 'head, hide behind your screens
Young giants
We're just fresh meat on your feed
Young giants
Step to us, you're gonna see
Young giants
We're ten feet taller than you'd have us believe

Young giants
Young giants
Young giants
We're ten feet taller than you'd have us believe

They take their bites
Just like piranhas
Sharpen their smiles
Kill me with kindness
We turn our backs, they're talking trash right there behind us
They'll do anything at all to fill the silence

Go 'head, hide behind your screens
Young giants
We're just fresh meat on your feed
Young giants
Step to us, you're gonna see
Young giants
We're ten feet taller than you'd have us believe
Young giants

Go 'head, hide behind your screens
Young giants
We're just fresh meat on your feed
Young giants
Step to us, you're gonna see
Young giants
We're ten feet taller than you'd have us believe
