

Under Stars

AURORA

My world beats outside our hearts
Times of need, we are apart
Under stars, we are alone
Under stars

Knuckles moves under your skin,
Your arms has hives, and drives it in
And they're moving all around
Until it cries
Under stars,
Under stars

Mother cries and turns to ripe
Walks outside, without a sign
The raining is on her skin
While she fazes every sin
Under stars,
Under stars

They have only fallen asleep
They have only fallen asleep
They have only fallen asleep
They have only fallen asleep
They have only fallen asleep
They have only fallen asleep

I've seen it many times
Each time they close their eyes and say goodbye
Rest in peace and give yourself to harmony
I've seen it many times
Each time they close their eyes and say goodbye
Rest in peace and give yourself to harmony
Give yourself to harmony
Underneath the stars
