

# BACKGROUND NOISE.

aurorawave

I hear them talking and it's background noise to me  
They don't know the first thing about this life I lead  
So say what you're gonna say, it don't matter anyway  
I hear them talking  
And it's background noise, background noise to me

You can say what you mean, safe behind your screen  
Cause I can't body nobody  
Got too much to lose it seems  
It won't get me nowhere to stoop down to your level  
Dancing by myself, I don't dance with no devil  
And if you've got a problem, well I'm easy to find  
If not, then move along and get behind  
Cause we're moving on so move along  
Righting of my mind to the writing of this song  
Careful what you wish for or me you will see  
Believe me when I say that you don't want it with me  
The words that you say, reflection of your heart  
Don't be surprised if my light hits your dark  
Fuck around and find out, I'll stand and wait  
Haters gonna hate while creators create

I hear them talking and it's background noise to me  
They don't know the first thing about this life I lead  
So say what you're gonna say, it don't matter anyway  
I hear them talking  
And it's background noise, background noise to me

One life, four kids, all work, no luck  
Many paths, this mind, many haters zero fucks  
Little time, much work, lotta shit to do  
Pay me no mind if it's a cost to you  
Said all that matters is the energy I bring  
What I stand up for and whom do I sing  
That's God above, the ones that I love  
Ones that need healing and need lifted up  
Words cannot hurt, lies they try to spread  
Gossip what they crave, I seem to keep them fed  
No mind to you, eyes to the one  
Falling of the moon mean the rising of the sun

I hear them talking and it's background noise to me  
They don't know the first thing about this life I lead  
So say what you're gonna say, it don't matter anyway  
I hear them talking  
And it's background noise, background noise to me

I hear them talk it's background noise to me  
They don't know the first thing about this life I lead  
Say what you're gonna say, it don't matter anyway  
I hear them talking  
And it's background noise, background noise to me
