

# INFERNO.

aurorawave

Don't ever say I never told you so  
Try to shield your eyes from the light, got to be blind not to  
see it  
Starts with a spark and then it's burning slow  
Until it grows so close, got to see it to believe it  
Strike the match, pour gasoline  
These flames engulfing everything  
It's scorched earth, the fire burn non-stop  
Coming for it all at any cost

I'm gonna burn brighter every time you throw me in the fire  
And you don't even want the smoke  
Ready for whatever so  
Even when the last flame passes  
Know that I will rise from the ashes  
And nothing gonna stop me, no  
Blazing like an inferno

I bet by now you can smell the smoke  
I see the flames kissing your tired old eyes with sun  
I hope your lungs will burn and see my future shining up ahead  
Lights are blinding, I can see the end of suffering  
Sound the alarm, go tell the masses  
Burning negativity down to the ashes  
Let it burn, let it burn, let it burn

I'm gonna burn brighter every time you throw me in the fire  
And you don't even want the smoke  
Ready for whatever so  
Even when the last flame passes  
Know that I will rise from the ashes  
And nothing gonna stop me, no  
Blazing like an inferno  
Yeah, you know

I'm gonna burn brighter every time you throw me in the fire  
And you don't even want the smoke  
Ready for whatever so  
Even when the last flame passes  
Know that I will rise from the ashes  
And nothing gonna stop me, no  
Blazing like an inferno  
Yeah, you know
