

In America

Austin French

Hate's been marching in the streets
Division like I've never seen
Most days I don't know what to do
Nowhere to turn, I turn to You

There's different colors on our skin
But we bleed the same when anger wins
There's walls that time can't seem to break
But I know there's power in Your name

Jesus come
Thy will be done
Draw us near
We need You here
In America

Let revival come alive
Heaven fall on stars and stripes
Heal our hearts and heal our land
Oh You're the only one who can

Jesus come
Thy will be done
Calm our fears
We need You here
In America

If You hold the world inside Your hand
If the lion lays down with the lamb
Oh, I know it's dark today, but still
I see that shining city on a hill

Jesus come
Thy will be done
Draw us near
We need You here
Jesus come
Thy will be done
Calm our fears
We need You here
In America
In America
In America
