

# Wildfire

Austin Snell

Ain't nothin' changed  
You showed to take my breath away  
Wear whiskey on your lips like gasoline  
In the fireside, your eyes, they can't be tamed  
Ain't nothin' changed

Girl, I already know when you get close  
I'll get lost in the same old smoke  
Turns out I can't be saved

From your wildfire the way you kiss me  
One touch and it gets me lit up and burnin' inside  
I try so hard resistin', but my heart just don't listen  
To what's goin' on in my mind  
Set my whole damn world ablaze  
I'll give in and feed the flames  
Let's light a spark tonight and start a  
Wildfire, oh-oh, ooh-ooh

I can't deny  
The way that fusion hot between you and I  
That's why every time

You come around, I run right back  
We both know that we won't last  
'Cause it all turns into ash

From your wildfire the way you kiss me  
One touch and it gets me lit up and burnin' inside  
I try so hard resistin', but my heart just don't listen  
To what's goin' on in my mind  
Set my whole damn world ablaze  
I'll give in and feed the flames  
Let's light a spark tonight and start a
