

# Between Us

**Austin Williams**

Between us

There's a bar full of people we don't know and don't know us either  
I ain't met you before but I knew it as soon as I seen ya  
Had to catch your name, your drink  
So I walked over to your side of the stage  
Whispered in your ear and I grabbed you by the waist  
Just to say "there's gotta be something between us"  
You can't take your eyes off me neither  
That dress showing off all your features  
I'm thinking that we should just leave here cause

There's gotta be something between us

We could slip out the back door  
Friends wonderin where we are  
Keep it a secret  
We could take it back to my place or we just throw it in park  
Slipping that black dress right down off your shoulder  
Kissing your body all over  
You know you want me and you know I want ya  
Keep moving closer till there's nothing between us  
Till there's nothing between us

Between us

We could do this shit again, it ain't gotta be a one night stand  
We can keep it between us  
We ain't gotta tell a soul nobody gotta know what goes on behind closed door  
s  
Your heels, my boots on the floor  
Skin to skin got you begging for more  
Leaving me wanting some more

Till there's nothing between us

We could slip out the back door  
Friends wonderin where we are  
Keep it a secret  
We could take it back to my place or we just throw it in park  
Slipping that black dress right down off your shoulder  
Kissing your body all over  
You know you want me and you know I want ya  
Keep moving closer till there's nothing between us  
Till there's nothing between us

Between us

We could slip out the back door  
Keep it a secret  
We could take it back to my place

Between us

We could slip out the back door  
Friends wonderin where we are  
Keep it a secret  
We could take it back to my place or we just throw it in park  
Slipping that black dress right down off your shoulder  
Kissing your body all over  
You know you want me and you know I want ya  
Keep moving closer till there's nothing between us  
Till there's nothing between us
