AUSTIN

You know me best by far  
You know all of my flaws  
You know how to comfort me in the worst times  
We have a special bond  
One that the others long for  
You are my perfect girl, you see all in me

'Cause I love the way you let me know it ain't all bad  
And I love the way you're always down to state the facts  
And if you stayed the whole weekend I wouldn't be mad at that  
'Cause everything you say'll make me feel this way  
And I ain't never had a feeling like that

You so rare, rare, rare  
Yeah, it's something about you  
You so rare, rare, rare  
Still don't know how I found you  
It's in the air, air, air  
Yeah, I can't breathe without you  
You so rare, you so rare, uh-huh

I don't know what I'd do if  
I didn't connect with you  
I'd be lost and confused without your touch  
Out of the million ones  
I found a real diamond  
I'm thanking God for letting me win so much

'Cause I love the way you let me know it ain't all bad  
And I love the way you're always down to state the facts  
And if you stayed the whole weekend I wouldn't be mad at that  
'Cause everything you say'll make me feel this way  
And I ain't never had a feeling like that

You so rare, rare, rare  
Yeah, it's something about you  
You so rare, rare, rare  
Still don't know how I found you  
It's in the air, air, air  
Yeah, I can't breathe without you  
You so rare, you so rare, uh-huh

Saw you and knew you were one of a kind  
You take away all the weight on my mind  
Something this real is so hard to find  
And that's why you get all my time

'Cause I love the way you let me know it ain't all bad  
And I love the way you're always down to state the facts  
And if you stayed the whole weekend I wouldn't be mad at that  
'Cause everything you say'll make me feel this way  
And I ain't never had a feeling like that

You so rare, rare, rare  
Yeah, it's something about you  
You so rare, rare, rare  
Still don't know how I found you

It's in the air, air, air  
Yeah, I can't breathe without you  
You so rare, you so rare, uh-huh
