Take It All Back

AUSTN

Can we take it all back, take it all back, back to you next to me?
Miss what we had, fallin' down fast, lost in your gravity

Bonfires, light up the night, stars in your eyes, lookin' at me
We ride, never get tired, you by my side, lost in the streets
Sometimes the feelings are nice, don't wanna confide in you
Sometimes I just can't deny, still wanna have ties, I do

And I hate that I'm out here pretending that I don't care
But it's always like something is missin' when you're not here

Can we take it all back, take it all back, back to you next to me?
Miss what we had, fallin' down fast, lost in your gravity
You so close, so far
Should be, in my arm
Take it all back, take it all back, back to you next to me

Gemini, can't you decide, always selfish to me
Damn lies, why am I stuck to good memories

And I hate that I'm out here pretending that I don't care (Nah, nah, nah, nah)
But it's always like something is missin' when you're not here

Can we take it all back, take it all back, back to you next to me?
Miss what we had, fallin' down fast, lost in your gravity
You so close, so far
Should be, in my arm
Take it all back, take it all back, back to you next to me

So close
So close
Can we take it all back? (Oh, oh, oh)
Can we take it all back? (No, oh, oh, oh)
You so close, so far
Should be, in my arm
Take it all back, take it all back, back to you next to me
So close
Take it all back, take it all back, back to you next to me
