

Everything

Autograph

Everything that you told me
All the dreams that we had in mind
We spent the summer together
I felt so good with you by my side

Now I feel so lonely
Should've kept the fire alive
You're the one and only
And it hurts inside

I would kill for you, I would die for you
Anything less is a lie
Cause I need you now, I can't live without
You are everything in my life

Every day is a struggle
It's hard to see and it's hard to breathe
An emotional puzzle
Slowly stealing my sanity

I don't know how to smile
How could I've allowed you to leave
Though it's been a while
It still hurts inside

I would steal for you, I would bleed for you
Never walk away from a fight
I still hear your voice, and I got no choice
I can't get you out of my mind
I would kill for you, I would die for you
Anything less is a lie
Because I need you now, I can't live without
You are everything in my life

Never gonna find any peace of mind without you
Running down the halls, crashing through the walls
And there's nothing I can do

I don't know how to smile
How could I've allowed you to leave
Though it's been a while
It still hurts inside

I would steal for you, I would bleed for you
Never walk away from a fight
I still hear your voice, and I got no choice
I can't get you out of my mind
I would kill for you, I would die for you
Anything less is a lie
Because I need you now, I can't live without
You are everything in my life

You are everything in my life
