

When We First Met

Automatic Loveletter

When we're together we drift away
Often out of sight
We feel things that we can't explain
If we try hard we just might

Shake shake baby on and on
We're gonna break break, break on out
Shake shake baby on and on
We're gonna break break, break on out

Sweep me off of my feet
Take me back to the beginning
The night when we first met
So me and you can keep a secret
You're not close enough to hear it

The night when we first met
The night when we first met
We first met
The night when we first met

Waves crash down, the moon is high
Take my hand, lead me in
Our clothes are on the shore, the waters cold
We keep each other warm

Shake shake baby on and on
We're gonna break break, break on out
Shake shake baby on and on
We're gonna break break, break on out

Sweep me off of my feet
Take me back to the beginning
The night when we first met
So me and you can keep a secret
You're not close enough to hear it

The night when we first met
The night when we first met
We first met
The night when we first met

We are in love
We are in love
In love
In love
In love

Sweep me off of my feet
Take me back to the beginning
The night when we first met
So me and you can keep a secret
You're not close enough to hear it

What they don't know can't hurt
It felt so right when you kissed me
Close your eyes and you miss me

The night when we first met
Shooting stars got us wishing
That our eyes pay attention

The night when we first met
The night when we first met
We first met
The night when we first met
