

Stab the Brain

Autopsy

Blackened veil across your face
Naked red below the waist
Legs spread wide, about to split
Poised above the casket lid

Dilation celebration
Distorted menstruation
Uteral rejection
Nameless form ejection

Drugged and damned, bloodshot eyes
Release the life that you despise
Blessed purge, gushing meat
Silencing of the heartbeat

Dilation celebration
Distorted menstruation
Uteral rejection
Nameless form ejection

Stab the brain as it slides out
Vaginal death ride, a bleeding spout
No new life to curse the earth
Crimson drainage, coffin birth

Ritual abortion sacrifice
Another chosen one you have become
Lift the blade up to your pulsing throat
Plunge it deep, embrace oblivion

All hail the dead queen
Place her on her throne
Fixate on her unblinking eyes
Witness the perverse unknown
Unknown
