

## Happy Faces

Autumnblaze

I've been walking through a burning town

Searching for a park of happy faces  
A weeping man on the foul ground  
Trying to smile without a reason

Happy faces have left the planet  
Happy faces don't exist

He cried for help but I just said cold  
I am not your saviour today  
There was a moment when I saw his face  
Sad without reproach  
I hated myself

I've wandered many miles towards the sea  
Demons of a weeping man behind  
The streets are waves again, they bury me  
I was never born to go ashore

Happy faces have left the planet  
Happy faces don't exist  
Happy faces have left our planet  
Happy faces never existed
