

# Know Somebody

Ava Max

I'm pacing back and forth 'til morning  
It's almost too hard to believe  
It feels like never-ending falling  
It's like this nightmare's on repeat

You think you really know somebody  
But all you really know is their name  
You think it's gonna last forever  
You're only just a pawn in the game  
You let them in your life  
Back into the knife  
They take away your love and then take your life  
Just when  
You think you really know somebody

Do you still see me when you kiss her  
Convince yourself that's what you need  
You say I'm fully out the picture  
But you still see me in your dreams

You think you really know somebody  
But all you really know is their name  
You think it's gonna last forever  
You're only just a pawn in the game  
You let them in your life  
Back into the knife  
They take away your love and then take your life  
Just when  
You think you really know somebody

One eye open  
One over your shoulder  
Friends are close but enemies are closer  
One eye open  
One over your shoulder

You think you really know somebody  
But all you really know is their name  
You think it's gonna last forever  
You're only just a pawn in the game  
You let them in your life  
Back into the knife  
They take away your love and then take your life  
Just when  
You think you really know somebody

Think you know somebody [12x]
