

Closer

Avalon

So you woke up today
Sick of being afraid you've come alive
And you're feeling the brave
Flowing deep in your veins
Like a fire inside
Don't lose that feeling
Don't lose that feeling

Coming outta the dark
With a hope in your heart
That's here to stay
And your future is bright
Like the stars in the night
Never gonna fade
Now you can see it
Now you can see it

You're getting closer
To a brighter day
Every step you take
Closer
With a little faith
You know it's not over, over
This is not the end
You're gonna make it through
Right now He's pulling you
Closer

Now you're looking ahead
Yeah, you're livin' again
Nothing in your way
There's a hope in your eyes
There's a reason to fight
You're not far away
And now you can see it
And now you can see it

You're getting closer
To a brighter day
Every step you take
Closer
With a little faith
You know it's not over, over
This is not the end
You're gonna make it through
Right now He's pulling you
Closer

No matter how far
Wherever you are
You're getting closer
This much is true
He'll carry you
You're getting closer
...

To a brighter day

Every step you take
Closer
With a little faith
You know it's not over, over
This is not the end
You're gonna make it through
Right now He's pulling you
Closer, closer
Pulling you closer, closer

Coming outta the dark
With a hope in your heart
That's here to stay
And your future is bright
Like the stars in the night
Never gonna fade
