So Many Ways

I'm your director, it's getting deep We don't need to rent nothing, we'll make our own movies I'm your director, it's getting deep We don't need a videotape or a camera To make this ghetto love scene

I wanna welcome everybody here tonight It's such a beautiful occasion I wanna tell you the way I feel, you know

This is for the ladies I wanna take you to a place you've never been before Sit back and enjoy this ride

Our love exploding in the air Like the works on the Fourth of July Or like the sun, how it sits upon the earth Shine through clouds in the sky

I might never get as much air time As a pilot would get, but I But I'm sure right to do things That we both haven't tried yet

Take a trip to the moon Just me and you, baby Then we'll shine on the earth I'll show the world what you're worth

Did you like that? Tell me, did you like that? I just wanna, I just wanna show So many ways, I wanna show you more

Take our love to another level, so many ways, I Wanna go to a new paradise Just one blink of an eye, so many ways I can And I'll never let you go, babe

'Cause this, this message of love Is what I'm sending to you I love you so much There's nothing I wouldn't do for you, for you

Let me be the reason You come from the floor with nothing but love Like an orphan at Christmas who gets a million toys There's no words to explain how it felt when we met But I, I'll try with this song and see how far I can get

It feels like Heaven When you're wrapped in my arms That's what comes over me It feels like Heaven

I just wanna, I just wanna In so many ways, I wanna show you more

Avant

Take our love to another level

So many ways I wanna go to a new paradise Just one blink of an eye So many ways I can And I'll never let you go, babe

Take you to a place far away from here Go somewhere to erase your fears And feel free about life, no worries in your life

Take you to a place far away from here Go somewhere to erase your fears Grass is greener on the other side Just sit back and enjoy this ride

So many ways, I wanna show you more Take our love to another level So many ways I wanna go to a new paradise Just one blink of an eye, so many ways I can And I'll never let you go, babe

Ain't nothing stopping us Let's face an opportunity Yeah, yeah, yeah
