

Until Forever and Again

Avatarium

Friend of darkness you come through
In black and white
Tell me are you really real
Or nachträglichkeit?

Friend of rumination
It's the last time, the last
I spit you out with gravel
And pieces of glass

This is the end
Till forever and again
Until forever and again
Until forever and again

Something here can not get out
Something not right
I see you with my inner eye
So petrified
As you feed me with your poison
Feed me dreams, feed me hell
I send you off with all my love
And bid you farewell

This is the end
Till forever and again
Until forever and again
Until forever and again

Friend of darkness, you come through
In black and white
Tell me are you really real
Or nachträglichkeit?
Friend of rumination
It's the last time, the last
I spit you out with gravel
And pieces of glass

This is the end
Till forever and again

Until forever and again
Until forever and again
