

Everywhere

AVEC

Fold me
Into your hands
I wanna become a part of you
Like you became a part of me too

Use me
I let you have it
And then again I lose myself
Inside of you

Show me your shark smile
Beneath your pale blue eyes
Let us go back to the lake
And the taste of salt water

When everywhere I see you
Everywhere leads to you
Every road I turn to
When it's always been you
The only way I move forward
Is turning back around

Cause everywhere I see you
Everywhere leads to you
Every road I turn to
When it's always been you
The only way I move forward
Is turning back around

Fold me
Into your heart
Let me be a part of you
Like you're still a part of me too

Slowly
I let you have me
And with the lights off and our bodies
On the backseat, oh love, oh love

When everywhere I see you
Everywhere leads to you
Every road I turn to
When it's always been you
The only way I move forward
Is turning back around

Cause everywhere I see you
Everywhere leads to you
Every road I turn to
When it's always been you
The only way I move forward
Is turning back around

I love you
With everything I've ever got
And I love you
With all of my fucking heart

When everywhere I see you
Everywhere leads to you
Every road I turn to
When it's always been you
The only way I move forward
Is turning back around

Cause everywhere I see you
Everywhere leads to you
Every road I turn to
When it's always been you
The only way I move forward
Is turning back around
