

# It's A Problem

AVEC

It's a problem  
This addiction  
Oh love  
Why didn't you just listen?  
Why didn't you just  
Call me up?

It's a problem  
The affection  
Broken hearts they never really heal  
We both know that, don't we?

Soaked in warm water  
I stand where you left  
My feet to the ground  
My head in my hands

Go jump into my car  
We'll turn this shit around  
I'll take you where we first kissed  
And made out in your car  
You handed me a key  
To your fucking house  
Only all this would end  
And you really think I could ever stop?  
Stop feeling anything, but love  
For you?

It's a problem  
Redirection  
Escaping all the power that you've had over me  
But who am I kidding

It's common knowledge  
I admit it  
You have to let shit go to get over it  
And god knows I'm trying

Soaked in warm water  
I stand where you left  
My feet to the ground  
My head in my hands

Go jump into my car  
We'll turn this shit around  
I'll take you where we first kissed  
And made out in your car  
You handed me a key  
To your fucking house  
Only all this would end  
And you really think I could ever stop?

Go jump into my car  
We'll turn this shit around  
I'll take you where we first kissed  
And made out in your car  
You handed me a key

To your fucking house  
Only all this would end  
And you really think I could ever stop?  
Stop feeling anything, but love  
For you?
