Bloodlust

Avenger

Fight, we will not fight again
Crashing down our swords in men
Kill and be killed for a facts
With no gain to all at last
Politicians tumble on tongue
Fight themselves than stand as one
Play with lives, they got no
Personality respect

Get up and scream - Get up and scream Throw your fists in the air Get up and scream - Get up and scream Stand against the war

You see hell's weapon Cold steel Bloodlust

Fear, it's fear what lames the brain They submit and go insane Fuck the war machine instead It's your live, so free your head

You are the evil but I'm not your slave Call it defence, it's an highway to the grave

You see hell's weapon Cold steel Bloodlust
