# think about it

**Avery Lynch**

My room and my phone and my shower are sick of me now
I use every memory of you to make sense of this somehow
I don't wanna look back I just wanna be there right now
But wherever there's you there's a version of me you let down

You made me need you
So much I'd lose me with you
Were you hoping I'd miss how messed up it all is
When you left me to just think about it

You made us the bed and I'm lying in it
While you left me to feel all of it
And you moved on like nothing's changed
Like if you ignored us we'd go away

Were you hoping I'd miss how you caused all of this
When you left me to just think, think about it

The lines that I drew how did you just ignore all of them
Directions you skim through, the test that you cheat so you
Get what you want in the end

Why did you make me need you
So much I'd lose me with you
Were you hoping I'd miss how messed up it all is
When you left me to just think about it

You made us the bed and I'm lying in it
While you left me to feel all of it
And you moved on like nothing's changed
Like If you ignored us we'd go away

Were you hoping I'd miss how you caused all of this
When you left me to just think, think about it

Think about it
Were you hoping I'd miss how messed up it all is
When you left me to just think about it
You made us the bed and I'm lying in it
While you left me to feel all of it
And you moved on like nothing's changed
Like If you ignored us we'd go away
Were you hoping I'd miss how you caused all of this
When you left me to just think
When you left me to just think
Think about it
