

Codebreaker

Aviators

Breathe it in, feel again
Another plume of smoke arises
From a dark and forceful end
Safe from none
We've become
The old foundation of the timeless
Underneath the city's thumb

Players in the game
We're all just details in the background
Always out of center frame
Break the firewall
Retake your access and infect them
Send a message for us all

Codebreaker can't you find
Can you read between the lines of code?
Tell me all that you know
How far down the hole does it all go?
Altered and obscured
You're the virus and the cure, in one
Execution's begun
Leave the truth unlocked, and we've won

Second chance, newer plans
Fully connected and exploring
Intertwining in braindance
Turning on, when they're gone
Watch for the eyes up on the skyline
Where they see you from beyond
Set your mission tonight
We're slowly turning less than human
Just to numb this city's bite
Edge of new frontiers
We're making for the outer reaches
Where the badlands end right here

Codebreaker can't you find
Can you read between the lines of code?
Tell me all that you know
How far down the hole does it all go?
Altered and obscured
You're the virus and the cure, in one
Execution's begun
Leave the truth unlocked and we've won
We'll rule this town
Just to shut it down

Never, never
I won't accept but we're
Together, ever free
Outlaws in every system
Dimming, dimming
Our only light inside keeps
Winning versus greed
Embracing our condition

Give your time
I want to you show you now and
Break your mind
We'll be the start of a new
Rebirthed hell
Pushing the cracks in our own
Synthetic shell
So break away now

Codebreaker can't you find
Can you read between the lines of code?
Tell me all that you know
How far down the hole does it all go?
Altered and obscured
You're the virus and the cure, in one
Execution's begun
Leave the truth unlocked, and we've won
We'll rule this town
Just to shut it down
