

Dark Star

Aviators

Never saw a view like the Earth from the stars
Wish I could observe but I'm stuck where you are
Suddenly in a dream state while drifting through space
Like personification, if truth had a face
Now I see you behind
The energy's shine
I want to believe
You could be

My dark star
I don't know what you are
But I've fallen so far
Without you
My escape
Want to see you create
A new world awake
Just like deja vu

Like hallucination I have seen but not heard
Here to be possessed when I'm too stunned for words
Silent communication, your thoughts into mine
Still dimensions away, my shadow out of time
Worn and lonely like me
But out here you're free
I want to believe
You could be

My dark star
I don't know what you are
But I've fallen so far
Without you
My escape
Want to see you create
A new world awake
Just like deja vu

Wait
By heaven's gate
Open the door to things
I've never seen before
So take me ashore
Give me the eyes to see
What's in your violet sky
In your cosmic tide
I'll stay by your side
And float through time
Together we climb
Ascending beyond our scars
With you, my guiding star

My dark star
I don't know what you are
But I've fallen so far
Without you
My escape
Want to see you create
A new world awake

My dark star
I don't know what you are
But I've fallen so far
Without you
My escape
Want to see you create
A new world awake
Just like deja vu
