

Game Over

Aviators

Hold your breath we're going under
Taking on the rain and thunder
I would take on anything for you
Split screen co-operation
You are my motivation
I'll watch your back, I always do

We'll make it out alive
We're side by side
When monsters block the way we'll take them down
We're getting closer
Just ahead
We're not out yet
With you I think that we've already won
It's game over

When we have been defeated
No other wins are needed
I'm feeling like a winner next to you
We'll keep on getting stronger
With these battles growing longer
We've got a chance to see this through

We'll make it out alive
We're side by side
When monsters block the way we'll take them down
We're getting closer
Just ahead
We're not out yet
With you I think that we've already won
It's game over

Give this level one more try
Make it out before we die
Never let it get the best
We can still complete the quest
Hold me close and watch behind
Look around and you will find
We're halfway to the end already
Take this potion, level two
Now we don't know what to do
Facing new obstacles here
Trying to combat our fear
Game over, we're out of lives
Let's just give it one more try
We've still got each other, baby

We'll make it out alive
We're side by side
When monsters block the way we'll take them down
We're getting closer
Just ahead
We're not out yet
With you I think that we've already won
It's game over
