

Impossible

Aviators

We found a reason to climb higher
Breaking the mold just to inspire
With all of our stars in line
Knowing there's no time to waste
It's the fire inside
The instinct, the drive
Now hold on, we're breaking new ground
No one stands to lose
So I want to choose
To embrace the hope that we've found
And suddenly I don't feel so alone
'Cause this is home

I want to take the step that seems too far
Then we'll get the chance to find out who we are
If it rains, it pours, but we keep pressing through
Nothing feels impossible with you
Two dreamers in hot pursuit
When we set our sights it's absolute
And I feel like we could make it all the way
Nothing feels impossible today

Breaking the rules to set them straight
Running our minds in figure eights
I know we are just the same
'Cause we'll never tame our hearts
And I promise you
When we've got no clue
I will do whatever it takes
Just to cheer you on
When the days go wrong
When we learn by making mistakes
We move on and we start again
With help from friends
(With help from friends)

I want to take the step that seems too far
Then we'll get the chance to find out who we are
If it rains, it pours, but we keep pressing through
Nothing feels impossible with you
Two dreamers in hot pursuit
When we set our sights it's absolute
And I feel like we could make it all the way
Nothing feels impossible today

Like the lights that give this city life
You're a glimpse of hope in miles of strife
When the problems feel much bigger than before
It's been worth it if we're having fun
'Cause my speed dial says you're number one
I don't want to stand alone anymore

I want to take the step that seems too far
Then we'll get the chance to find out who we are
If it rains, it pours, but we keep pressing through
Nothing feels impossible with you
Two dreamers in hot pursuit

When we set our sights it's absolute
And I feel like we could make it all the way
Nothing feels impossible today
