

# Me, My Phobias, and I

Aviators

If only I could  
Step out of this shell  
I'd escape this do-it-yourself hell  
And I'd stand up tall  
Taller than the trees  
And see the path that someone's cleared for me  
Now wait a second  
I'm scared of the dark  
The sun has set now  
I've watched the light depart  
My feet are frozen  
I'm terrified  
I'm struggling  
To fight my fear tonight

So how can I face my fears  
If they're all out to get me  
And I'm getting tired of wearing a disguise?  
Will you make them all disappear  
So there's no ghosts left to haunt me?  
Just me, my phobias and I

I'm only human  
There's monsters waiting there  
I can't stand the sense of danger in the air  
I'm not a hero  
I'm so afraid  
I've never solved a single problem that I've made  
Now wait a minute  
In this haunted place  
I think I see  
Up there a ghastly face  
I hear it whisper  
It knows my fears  
Do I have the courage  
To make it out of here?

So how can I face my fears  
If they're all out to get me  
And I'm getting tired of wearing a disguise?  
Will you make them all disappear  
So there's no ghosts left to haunt me?  
Just me, my phobias and I

If ever there was  
A moment I found  
Myself useless  
Then it would be now  
But I've made it this far  
Even if I'm lost  
I'll gather my courage  
Whatever the cost  
Because what's the purpose  
Of living this way  
I'm feeling my doubt swell  
But I push it away  
I may be afraid

I may be bruised  
But I'm feeling like a winner  
So I can't lose

So how can I face my fears  
If they're all out to get me  
And I'm getting tired of wearing a disguise?  
Will you make them all disappear  
So there's no ghosts left to haunt me?  
Just me, my phobias and I

So how can I face my fears  
If they're all out to get me  
And I'm getting tired of wearing a disguise?  
Will you make them all disappear  
So there's no ghosts left to haunt me?  
Just me, my phobias and I

(There's so much fear)  
(So make it disappear)  
(I'm not that strong)  
(But you can try to prove me wrong)
