

# Moonlight

Aviators

Stand in the rain tonight  
Under the street lights  
We find ourselves  
We find ourselves  
Maybe the misery  
Has become part of me  
Inside this shell  
Inside this shell  
It's hard to find the one you love when you can't find your soul  
Looking for answers in a bottle now you're in the cold  
I've seen the world from every angle that I've found this far  
And after all the cards have fallen I've been dealt these scars

Don't let a foothold be your crutch  
Don't lose the drive you need so much  
When your last push becomes a shove  
You've taken off the gloves  
We've felt the moonlight steal our hearts  
These nights of lovers under stars  
Their secrets locked up in their cars  
Remnants and broken parts, of lost love

Nothing to show for this  
Every shot's a miss  
And no one sees  
And no one sees  
Been to the sky and back  
We've felt the thunder clap  
It's part of me  
It's part of me  
It's hard to find the one you love when you can't find your soul  
Looking for answers in a bottle now you're in the cold  
I've seen the world from every angle that I've found this far  
And after all the cards have fallen I've been dealt these scars

Amateur heartbreak  
Oceans of mistakes  
That lie within  
That lie within  
Sinners with innocence  
Lovers within the midst  
Of hate again  
The pain again  
Kill off the need, the lust  
Rescue the both of us  
While we're awake  
While we're awake  
Moonlight will carry you  
Onward to hell and through  
Until we break  
Until we break
