

Wings

Aviators

Well I'm familiar with the concepts
Of needing friendship in the darkness
'Cause these imaginary friends I've made are gone
So maybe then it's time to embrace
The magic calls me into this place
Since the outer world I thought I loved feels wrong

Heads will roll
The times may change
But we're wiser now together
And we won't stop at anything
Twists of fate
And winds turn our page
But I'll fly with you forever
Right here
With you I've got my wings

Sure, I'm missing what I left home
But you lit a fire in my bones
And I'm so inspired to show you what I am
In a family of misfits
You're the spell I need to fix this
To dissolve the walls I've built with my tired hands

Heads will roll
The times may change
But we're wiser now together
And we won't stop at anything
Twists of fate
And winds turn our page
But I'll fly with you forever
Right here
With you I've got my wings

Beyond my wildest dreams
You showed me what I need
And I can't ever turn away again
Felt lost in lonely times
But now these wings are mine
And I'll keep soaring onwards to the end

Heads will roll
The times may change
But we're wiser now together
And we won't stop at anything
Twists of fate
And winds turn our page
But I'll fly with you forever
Right here
With you I've got my wings

Heads will roll
The times may change
But we're wiser now together
And we won't stop at anything
Twists of fate
And winds turn our page

But I'll fly with you forever
Right here
With you I've got my wings

With you I've got my wings
