

We won't go away  
Try again another day  
I'm a UFO

Now we're in the darkness as we collide  
Whispers, they echo, and our hearts divide  
Now we're safe in shadows – do you know why?  
All my pretties learn to run and hide

Caught between the truth and lies  
Are you just waiting?  
Are you my prize?  
Horror seeps into your eyes  
Was this the price to be inside?

Make a wish  
And close your eyes  
If we make it out alive  
We both know this is goodbye  
But I don't mind

I'm your favourite outcast  
I'm your favourite high  
You can see me in your nightmares  
When you hear my lullaby

We won't go away  
Try again another day  
I'm a UFO  
Don't you run away  
I can sense you like to play  
I'm a UFO

Lost in the maze, we're all trapped again  
Sold it was heaven, but hell crept in  
Wearing those scars time cannot erase  
On the edge, I always find my place

Make a wish  
And close your eyes  
If we make it out alive  
We both know this is goodbye  
But I don't mind

I'm your favourite outcast  
I'm your favourite high  
You can see me in your nightmares  
When you hear my lullaby

We won't go away  
Try again another day  
I'm a UFO  
Don't you run away  
I can sense you like to play  
I'm a UFO

I'm your favourite outcast

We won't go away  
Try again another day  
I'm a UFO

I'm your favourite outcast  
I'm your favourite high  
You can see me in your nightmares  
When you hear my lullaby

We won't go away  
Try again another day  
I'm a UFO  
Don't you run away  
I can sense you like to play  
I'm a UFO
