

## Buckshot

**Avoid**

Sleeping with the lights turned on  
Beaten down enough to know  
Everything I did was wrong  
Oh, so forget it  
Alone, it's what your body feels when you're not home  
Night after night  
I lay awake

Nothing from above  
Nothing but my fear below  
Never coming home  
I'm never coming home  
I've given all I have left  
I'm breathing my last breath

You don't get anywhere sitting around watching the world turn  
You don't get anywhere pretending everything's okay  
React, take blame  
Pulled deeper by the hands of fate  
Fading away, I am disease  
React, take blame  
Pulled deeper by the hands of fate  
Fading away, I am disease

Nothing from above  
Nothing but my fear below  
Never coming home  
I'm never coming home  
I've given all I have left  
I'm breathing my last breath
