

Ayy, ayy, um
Da-da-da-dum-dum, mm
Ayy, ayy

What's up? What's wrong?
Do you wonder if she's crying while she's paying her dues?
One page a day
Tryna write the reasons why she couldn't do what you do
Get up, get lost, and leave it behind
Would've been the easier bind
Now she's taking pills, not tryna fight with her mind
While she stop and figure it out

Guess we gotta live and learn to leave it behind
I wish that meant that it wouldn't hurt
Know we gotta live and learn, taking your time
Telling you for what it's worth
Nothing lasts forever, not love, not pain
Wake up and do better for you
Know we gotta live and learn, gotta live and learn
Living so we live and learn (oh-whoa)

Love like I do
Yeah, she preaching, busting, reaching, tryna live it herself (oh)
Takes one to know one (huh)
Guess we're crazy in a different way
Nobody said it'd be easy and believe me
It would hurt as much if you would've stayed
Years on, beloved
Gotta serve yourself to heal one day (no, oh)

Guess we gotta live and learn to leave it behind
I wish that meant that it wouldn't hurt
Know we gotta live and learn, taking your time (yeah)
Telling you for what it's worth
Nothing lasts forever, not love, not pain (not pain)
Wake up and do better for you (mm)
Know we gotta live and learn (learn), gotta live and learn (learn)
Living so we live and learn (for you)

Live and learn
Wake up and do better, gotta get to higher level, yeah
Live and learn
Been in it for a minute, feel the opposite of better
But we live and learn (ooh-whoa)
Anything, we in it together (no, oh)
Live and learn

Guess we gotta live (no, whoa)
Live and learn
Guess we gotta live
Live and learn
