

# Shining Star

AWA

Got all the love from my mother  
She made me feel like no other  
Even through times that she didn't  
She always showed her resilience  
God knows I'm my mother's daughter  
Learned from the pain of my father  
Now I see he didn't mean it  
But we all got our demons

Love should be calm  
Love should be strong  
Love that is cold don't keep you warm  
Feel like I knew it all along

Body to body  
No longer lonely  
Sharing this holy  
I found my one and only shining star  
Hmmmm  
One and only shining star

I got caught up in the matrix  
Looking for love in new faces  
Shine like the moon through its phases  
I guess, I should ride the wave sis  
I feel like I'm getting softer  
I'm not reacting so often  
Now I'm responding with options  
Karma so clear like my conscience

Love should be free  
Love should be easy baby  
Love keeps you anchored through the storm  
I've never embodied this before

Body to body  
No longer lonely  
Sharing this holy  
I found my one and only shining star  
Hmmmm  
One and only shining star

Body to body  
No longer lonely  
Sharing this holy  
I found my one and only shining star  
Hmmmm  
One and only shining star
