

Follow the Beast

Axel Rudi Pell

On the edge of our time, at the end of our line
Black dust covering the earth
How many times you'd seen the children cry
Shortly following their birth

For once and for all
We are heading into destruction
The empire will fall
The bad on the rise

Follow the beast
The end is in sight, the end's coming near
Follow the beast
Dark clouds all over the sea
Follow the beast
There's no way out, living in fear
Follow the beast
Stay close to me, don't disappear

Falling from heaven straight down to earth
Watching the clouds fade away
Hitting the ground and shaking on the floor
Unsure what will be there

For once and for all
We are heading into destruction
The empire will fall
The bad on the rise

Follow the beast
The end is in sight, the end's coming near
Follow the beast
Dark clouds all over the sea
Follow the beast
There's no way out, living in fear
Follow the beast
Stay close to me, don't disappear

Follow the beast
The end is in sight, the end's coming near
Follow the beast
Dark clouds all over the sea
Follow the beast
There's no way out, living in fear
Follow the beast
Stay close to me, don't disappear

Follow the beast
Follow the beast
Follow the beast
