

# Collide

AxeWound

I feel the presence  
Cold breath upon my skin  
A tortured soul  
That cries and begs for me  
To let it in

It's in the shadows  
I can feel you in my bones  
Just manifest yourself  
And show to me  
I'm not alone

Yes it's me in the shadows  
It will be on your grave  
I want to feast on your spirit  
I want to make you my slave

Cast you away  
Leave me alone  
Here I will stay  
For the rest of eternity

When these two worlds collide  
There's nothing left behind

Cast you away  
Leave me alone  
Here I will stay  
For the rest of eternity

When our two worlds collide  
There's nothing left behind.

I hear the whisper  
This future just wont subside  
This fight I wont give in  
My minds become a battlefield

Yes it's me in the shadows  
This will be on your grave  
My only goal is to kill you  
I'm gonna make you my slave

Cast you away  
Leave me alone  
Here I will stay  
For the rest of eternity

When these two worlds collide  
There's nothing left behind

Cast you away  
Leave me alone  
Here I will stay  
For the rest of eternity

When our two worlds collide

There's nothing left behind.

When our two worlds collide  
There's nothing left behind.

No  
I wont go  
I wont go  
I wont leave

No  
I wont go  
I wont leave  
You can't get rid of me

No  
I wont go  
I wont go  
I wont leave

No  
I wont go  
You can't get rid of me

Cast you away  
Leave me alone  
Here I will stay  
For the rest of eternity

When these two worlds collide  
There's nothing left behind

Cast you away  
Leave me alone  
Here I will stay  
For the rest of eternity

When our two worlds collide  
There's nothing left behind
