Patience

Ay Em

Just ended my day shift
I'm 'bout to stay in
Couple of days in
Shit's got me ageing
All my bruddas are caged in
Free my brudda Money ASAP
Ain't seen my brudda in ages
Patience, told us to be patient

This shit basic
Remember days we used to daydream
Now I'm active on the night shift
Put a runner on the dayshift
Can't afford to run around
In the AP, bunnin' up a cloud
Mummy said I need to fix up
Man need to fix up (Shit)
Run it up, pour another in my double cup
Not enough, I need to double up
Gotta have it just to bubble up

Only say what they wanna say
Never love me 'cause they wanna stay
On my grind and it's back to the basics, basics, basics
Send my arrangement
And we don't talk to strangers

Free all the guys man, locked up
Patience a virtue, soon home

Just ended my day shift (Oh)
I'm 'bout to stay in (Oh)
Couple of days in (Oh)
Shit's got me ageing (Oh)
All my bruddas are caged in
Free my brudda Money ASAP
Ain't seen my brudda in ages
Patience, told us to be patient

I swear, I ain't even got no patience
Last time I seen gang, I swear down, it's been ages
Ever since I made me some change, all I've ever seen is changes
We used to say we ain't gonna live life basic, then you went and put 'em on basic
Free my dargs, man, I miss them, fuck the system
All they ever wanted was a Nando's
Every other night in the bando
Now any time we ever get to speak, we only get to do it through a Zanco
Still keep you in my prayers and we'll be here when you land, bro
That's facts, no cap
Can't look after yours, so now we gotta go and put yours on our back
They ain't my friends, those my brothers
Still love man same way even though we ain't even got the same mothers

Just ended my day shift (Oh)
I'm 'bout to stay in (Oh)
Couple of days in (Oh)

```
Shit's got me ageing (Oh)
All my bruddas are caged in
Free my brudda Money ASAP
Ain't seen my brudda in ages
Patience, told us to be patient (Oh)

Patience, told us to be patient
Patience, told us to be patient
Patience, told us to be patient
Patience, told us to be patient
```
